

I Feel My Savior's Love Things We See

Activity Instructions:

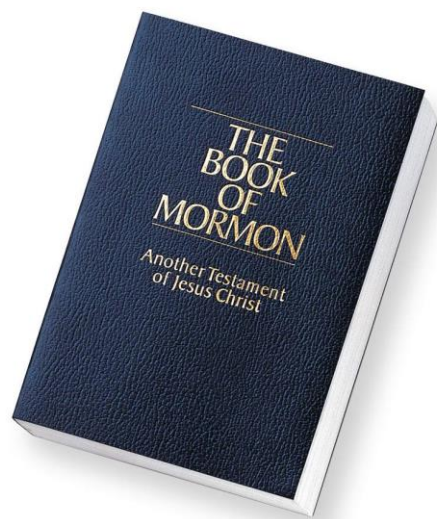

1. Collect 8-10 pictures or physical items of objects that might help us remember the Savior's love for us. If using pictures, print and cut out pictures.
2. Bring your items to primary and set them up before singing time. You might choose to tape pictures around the room like a "gallery" or post them on the whiteboard.
3. At the beginning of primary, invite the children to look at the items/pictures and see if they can identify something that all the pictures have in common.
4. Explain that each of these items can help remind us of the Savior's love for us. Invite the children to share other things that help them feel loved.
5. Then, start teaching the first verse of I Feel My Savior's Love.

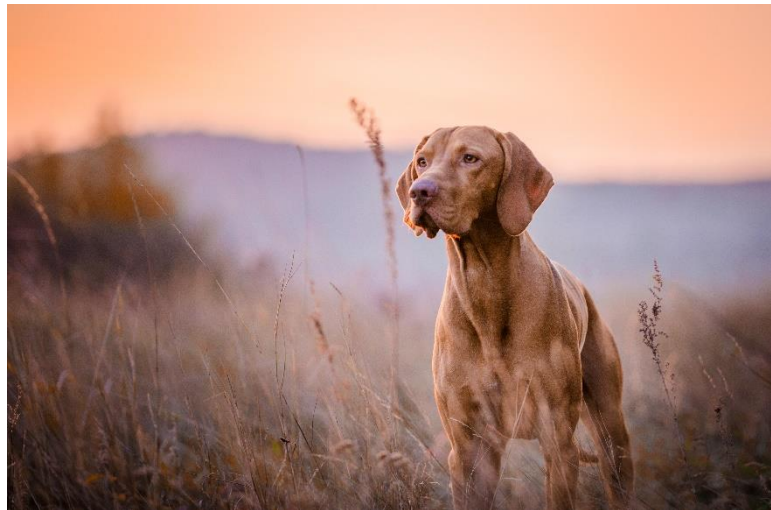

Extension Ideas:

- Give each child a piece of paper and some crayons at the beginning of primary. Invite them to draw something they can see that helps remind the children of the Savior's love for them. Allow children to share their drawings as you begin teaching the song.
- To use as a review activity, post "things we see" pictures around the room. On the back of each picture, write a fun way to sing the song. For example, you might have them stand on one foot or walk in a circle while they sing!
- While you review the song, draw something you see that testifies of the Savior's love. See if the children can guess what the drawing is! Then, give them a turn!
